| DD3 | This is the third DDL | 2 Hours Ago |

Done Cancel

We split the setup form into two forms that is why we added a second navigaton level for lists and optional configuration.

Also ensure that either done or save and cancel actions are fixed on the bottom left corner of the lightbox.

Add new list

The image shows a lightbox titled "Add List" with a close button (X) in the top right corner. The form contains the following sections:

- Name ***: A text input field with a row of flags below it.
- Description**: A text input field with a row of flags below it.
- Data Definition ***: A text input field.
- Select**: A button.
- Workflow**: A section with the text "No Workflow" below it.
- Permissions**: A section with a right-pointing arrow (>) at the end.

At the bottom left of the lightbox, there are two buttons: a blue "Done" button and a "Cancel" button. A red arrow points from the "Cancel" button towards the right, towards the text "Fix done (Save) button and cancel button on the bottom left corner of the lightbox."

Fix done (Save) button and cancel button on the bottom left corner of the lightbox.
