

Mini Cart Widget and Component

In Liferay DXP, you have a custom mini cart component that is available in accelerators like Minium and Speedwell. There is also a Mini Cart widget that comes out-of-the-box (OOTB). This is in addition to the already available Cart and Cart Summary widgets.

Mini Cart Widget

Liferay Commerce comes with a Mini Cart widget that provides a quick overview of the current cart status. See [Using the Mini Cart Widget](#) for more information on how to add it to your site.

Mini Cart Widget Information

Below is an overview of the information provided by the mini cart widget.

Items (2)		Checkout	Edit Cart
	U-Joint SKU: MIN55861	2 x	\$ 24.00
Subtotal			\$ 48.00
Tax			\$ 8.64
Total			\$ 56.64

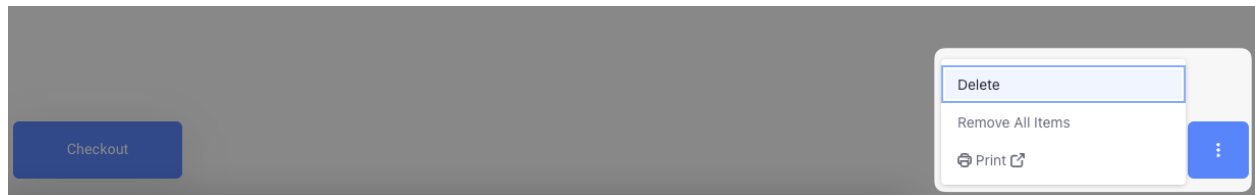

At the top, you can see the title Items, followed by the number of items present in the cart. This takes into account the quantity of each item and displays the total sum. For instance, if 2 units of Product A and 2 units of Product B are present in the cart, it is displayed as 4 at the top.

On the top right side, you have two buttons. One to start the checkout process and the other to edit the cart. Clicking on *Checkout* starts the checkout process where you can complete placing the order.

		Checkout	Edit Cart
		2 x	\$ 24.00
			\$ 48.00
			\$ 8.64
			\$ 56.64

Clicking on *Edit Cart*, takes you to the *Pending Orders* page with the order selected. You can change the order's billing/shipping address, add order notes and delete items from the order. If

you click on the 3-dot () icon at the bottom right, you have options to delete the order, remove all items from the order, or print the order.

The bottom portion shows a summary of the subtotal, tax and total amount. The subtotal value is the sum of prices of the items minus the discounts on the items and the subtotal if any. The tax values is calculated as per the channel settings and the total value is the sum of these two (subtotal + tax).

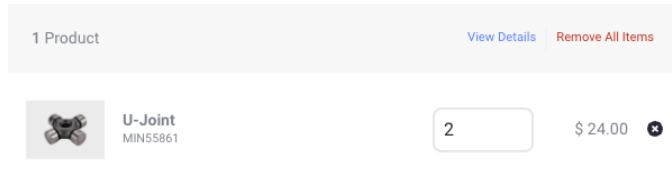

Mini Cart Component

The mini cart component is not an OOTB widget, and comes with accelerators like Minium and Speedwell. There are some differences in the data that is displayed in the component as well as how it is displayed. See the overview below.

Mini Cart Component Information

Here's an overview of the information provided by the mini cart component.

Quantity	2
Subtotal	\$ 48.00
Subtotal Discount	\$ 0.00
Order Discount	\$ 0.00
Total	\$ 56.64

SUBMIT

At the top, you have information on the number of distinct products in the cart at the top left. It does not take into account the quantity of each item like the mini cart widget. You can also notice the same in the bubble that appears on the mini cart icon when adding products. It only increments the count if you add unique products to the cart. On the top right, you have two buttons. One to view details of the current order, and the other to remove all items in the cart. If you click on View Details, it takes you to the Pending Orders page, with the current open order selected.

The mini cart component displays each item in the cart along with a quantity selector and a delete button. You can use the quantity selector to adjust the quantity of items in the cart and it

automatically updates the summary section. If you click on the delete button, you have the option to undo the action for a little over 2 seconds before it disappears.

Displaying the total item count in Mini Cart component

You may want to display the total number of items in the cart including each item's quantity rather than showing the number of unique items. There is a configurable property in the theme settings that you can change to achieve this.

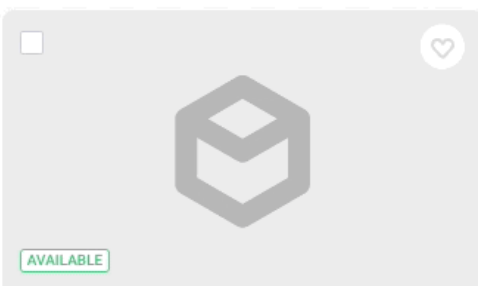

1. Open the *Site Menu* () and navigate to *Site Builder* → *Pages*.
2. Select any page where the mini cart is available. The example uses the *Catalog* page.
3. Click the 3-dot () icon next to the *Catalog* page and click *Configure*.
4. Select the *Look and Feel* tab and scroll down to the *Theme* section.
5. Click on *Define a specific look and feel for this page*. This enables several options.
6. Toggle the second option in the list to display total items count in the mini cart.
7. Click *Save*.

Go back to the *Catalog* page and verify that the mini cart now shows the total number of items present in the cart.
